Micheal Whitney

Edmonton, AB · mike.whitney1313@gmail.com · michealwhitney.github.io

EXPERIENCE

TOTAL LIFE **Hybrid/Remote Position**
Full Stack Developer **2025 - Present**

- Built an in-house electronic health record (EHR) system with high-performance RESTful APIs in **GoLang**
- Built a browser-based video therapy experience with LiveKit, serving 6,000+ users
- Designed and implemented frontend using **Vanilla JavaScript and CSS,** and **Go Templates**
- Applied HIPAA compliance requirements across the platform, safeguarding protected health information through role-based access control, encryption at rest and in transit, and audit logging.
- Designed a **PostgreSQL** database to handle complex user relationships and medical data.
- Completed replacement of legacy infrastructure which used a **Django** backend with a **React** frontend

VEST CAPITAL **Remote Position**
Full Stack Developer **2024 - 2026**

- Built and integrated a full-stack data aggregation and analysis tool into a client's existing web platform
- Integrated **Anthropic's Claude API** for automated web scraping and user interaction
- Built and integrated RESTful APIs using **Node.js** and **Express**
- Designed and deployed frontend using **Vanilla JavaScript, HTML,** and **Bootstrap**
- Designed and managed **MySQL** database for data handling and storage
- Deployed project through **AWS**, leveraging **EC2** configured via a **Load Balancer**, **S3 Bucket**, and an **RDS**
- Collaborated with clients to gather requirements and deliver solutions

Selected Project Experience

- Libertalia: Self-Hosted Personal Platform (GoLang, Jin, Tailwind, Self Hosted)
  - Architected and self-host a modular full-stack web app combining variety of apps such as nutrition, finance, job-search, and used-car finder tools behind one authenticated dashboard
  - Integrated AI to estimate meal macros from photos, screen CARFAX reports against custom rules, and score job postings against my resume

- LineupWizard.gg (React, JS, MongoDB, HTML, CSS, Firebase)
  - Architected and built an interactive web application for exploring video game strategies using React, JavaScript, Node.js, and MongoDB
  - Optimized server-side logic and front-end code, significantly improving application performance and load times
  - Deployed and maintained the application through Firebase and Google Cloud Platform, managing hosting and CI pipeline

EDUCATION

UNIVERSITY OF ALBERTA **April 2025**
Bachelor of Science in Computing Science, Minor in Psychology

- Relevant Coursework: Natural Language Processing, Machine Learning, AI, Software Engineering, Reinforcement Learning, Algorithms, Data Science

SKILLS

- **Proficient Programming Languages:** GoLang, Python, JavaScript, SQL, HTML, CSS
- **Familiar Programming Languages:** C#, React, Java
- **Frameworks & Libraries:** Claude API, React, Bootstrap, Node.js, Express.js, BeautifulSoup
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Cloud & DevOps:** AWS, Google Cloud Platform, exposure to Azure
- **Software/Tools:** Postman, GitHub, Visual Studio Code

AWARDS

- Red Bull Athlete representing Canada (Red Bull Campus Clutch 2022)
- Highschool Valedictorian (2020)
